

## APM- series PLC FLYER

### Main features:

- AP-6 series of YUDIAN PLC, was developed with high quality and stability.
- 32 bit ARM Cortex-M3. Easy installation, used in plastic machinery, level press machinery, beverage machinery etc.
- Max input /output can be extended to 256 points.
- Input type is NPN , output is transistor. Analog input supported
- Support MODBUS RTU/ASCII, CANBUS, AIBUS
- Basic command time is 0.01us, application command time is 0.08us
- 5 times faster than other brand PLC.
- Support instant updating command
- Allow 10ms instant electricity-cut, Flash ROM is saved for ever
- LD is qualified with IEC1131-3 rule, support C/C++ high speed method.

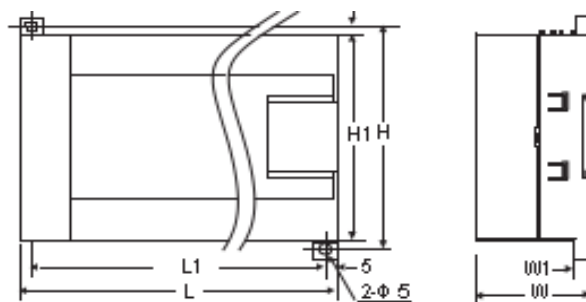

### Appearance Description

- 1.DIN fiex button
- 2.DIN rail 35mm
- 3.Direct fiexed hole
- 4.Program communication output/input(RS-232C)
- 5.Extended equipment interface
- 6.Output/input terminal
- 7.Output/input terminal
- 8.Input/output indicating light
- 9.Input/output indicating light
- 10.Power supply, running status and mistake problem indicating light

- 11.Output/input cover
- 12.Output/input cover
- 13.Output/input board
- 14.Output/input board
- 15.RS485 internace

主机型号 (mm)	L	L1	W	W1	H	H1
